4 Yard Low Profile Soil Feeder

Model # 16003-LP (single phase) 16004-LP (three phase)

Soil feed hoppers not only save labor; they also enhance the continuous flow of your system. With a Bouldin & Lawson Soil Feeder, you spend less time filling production machines with media. The soil feeder lets you bulk load media so that equipment can continuously run for longer periods of time.

Each unit can be used as feed hoppers for continuous soil mixing lines, potting machines, or flat fillers and offers bulk media that is supplied at required levels.

Each hopper features bed roller construction to reduce friction and extend the life of the belt and drive mechanism. The full skirting reduces excessive spillage and dust. An adjustable soil gate directs material flow.

Low dump height for skid loaders.

Specifications

Power	3 HP/ 220V/ single or three phase
Dimensions	15' 6" L x 6' 6" W x 6' 10" H
Weight	Approximatly 2,245 lbs
Portability	Stationary
Options	Lengthwise and crosswise agitators Extra-bed rollers and jackshaft for heavier soils Remote start/stop Auto call which allows the equipment fed by the hopper to start or stop feeding material as necessary

Made in the USA
