Precision® Needle Seeder

Model # 18311

The Precision Needle Seeder will sow a wide variety of seed types into most standard plug trays. This patented seeder is designed for the grower who demands speed and accuracy when sowing small, difficult, and odd-shaped seeds.

The Precision Needle Seeder will give you increased sowing accuracy, simplicity of operation, quick change-over, and low maintenance. This unit features an illuminated dust separation seed pan that helps separate dust from seeds.

Linear action seeding increases accuracy, with an adjustable vibrator; vacuum controls, and large capacity top coating unit for uniform covering of finished trays. PLC controls allow quick and easy change-overs. Eight sets of various sized needles are included to accommodate multiple seed sizes.

Specifications

Power	110V/ single phase/ 60 Hz
Dimensions	99"L x 28"W x 52"H
Production	Up to 200 trays per hr. 300 with optional seeding head (tray dependent)
Options:	220V/ Single or Three Phase/ 50Hz
Portability:	4" casters optional

Made in the USA
