# Seed Cleaner

## **Model # 19300 (single speed) 19301 (variable speed)**

Available in two models: single and variable speed. The Bouldin & Lawson Seed Cleaner is designed to clean seed with soft pulp, such as dogwood, apple, and pear.

The Seed Cleaner operates with a small stream of water in the hopper to remove pulp. This process leaves only the cleaned seed. The cleaning plate is adjustable for various sizes of seed. The seed cleaner is sold as a complete unit with motor and controls.
