BouldinCorp™ Family**

InstaPotter™ Pro with Drill

The Insta Potter Pro with Drill Option is designed for efficient potting of step-ups as well as bare root materials into containers ranging from 14" to 24" diameter.

A variable speed low-profile 2 yard hopper or optional 4 yard provides a consistent flow of material over a 24" wide variable speed planting conveyor. This allows the grower to set the pace to meet production goals.

An automatic soil return system recovers unused soil and delivers it back to the material hopper. The system is easy to operate, with quick change-overs and low maintenance.

Specifications

Power	220 V/ Single phase/ or Three phase 50 or 60 Hz
Production	Up to 2,750 1 gallon pots an hour (1,200 drilling)
Capabilities	14" to 24" diameter pots
Options	Bulk feeding system Vibrator for planting conveyor Infeed or take-off conveyors 4 yard hopper
