Maxi Pro™ Filler

Model # 13376

High Speed production and uniform filling of multiple types of containers are characteristics that define the Maxi Pro Filler. Equipped with a variable speed soil chain, this machine is capable of filling a full range of containers from plug trays to hanging baskets and planters up to 16" tall.

The standard Maxi Pro includes a variable speed filling conveyor with a powered pot transfer, one cubic-yard soil hopper, self cleaning powered rotary brush and power sweep, a powered soil return auger, and a soil flow diverter for larger containers.

The rack and pinion adjustments easily make the Maxi Pro the most versatile and user friendly flat filler on the market. Direct drive gearboxes and sealed bearings aid in low maintenance.
